Summary

Proactive software engineering student specializing in responsive web development and AI integration. Proficient in HTML, JavaScript, Python, and Flask, with a proven track record of engineering complex platforms, including real-time workspaces. Seeking to contribute strong skills and full-stack capabilities to a dynamic development team.

Education

Invertis University	B.Tech
Computer Science and Engineering	Bareilly • 2024-2028

Skills

C++	HTML5	CSS	JavaScript	Python	Kotlin
-----	-------	-----	------------	--------	--------

Experience

Eduskills Acedamy	Remote
Java Full Stack Developer Virtual Internship	Jan-Mar 2026

- Built and integrated RESTful APIs using Java and Spring framework to handle server-side logic and database operations. Developed interactive front-end components using HTML, CSS, and JavaScript, ensuring smooth client-server data exchange.

Google	Remote
Google Android Developer Virtual Internship	Oct-Dec 2025

- Developed and structured mobile application layouts using Android Studio, implementing responsive user interfaces for diverse screen sizes.

Projects

Alumni Engagement Portal	Apr 2026
--------------------------	----------

- InvertisConnect | Next.js, Supabase, Tailwind, AI. Built a secure networking platform connecting students and verified alumni featuring real-time chat and strict Role-Based Access Control (RBAC). Integrated an OpenAI-powered moderation engine to automatically filter spam and maintain a high-quality blog feed.

Heart Attack Risk Predictor	Mar 2026
-----------------------------	----------

- Built a comprehensive Hospital Management System to optimize operations, featuring modules for patient/staff management, appointment scheduling, and data analytics.

Yatrimate (Bus transportation system)	Sep 2025
---------------------------------------	----------

- Developed a real-time public transport tracking and scheduling application for small cities using Node.js, PostgreSQL, and Tailwind CSS, featuring automated timetables and dynamic fare estimation.

Smart Attendance with RFID	Oct-Dec 2024
----------------------------	--------------

- Developed an automated, RFID-based attendance tracking system using C++, ESP32, and Google Spreadsheets, featuring a multi-platform dashboard for real-time monitoring and reporting.

Certifications

SHAASTRA - Embedded Programming Challenge IIT MADRAS.

ADOBE - Adobe India Hackathon - Online MCQ Assessment + Coding.

DELOITTE - Deloitte Data Analytics Job Simulation (Forage).
