Professional Summary

Computer Science and Engineering student with experience in full-stack web development, mobile apps, and AI-integrated systems. Skilled in building real-time platforms and scalable applications using technologies like Next.js, Spring Boot, and Node.js. Passionate about problem-solving and contributing to impactful engineering teams.

Education

Invertis University

Bachelor of Technology in Computer Science and Engineering

Bareilly, Uttar Pradesh, India

Aug 2024 – May 2028

Technical Skills

Languages: C++, JavaScript (ES6+), Python, Kotlin, HTML5, CSS3.

Frameworks & Libraries: Next.js, React, Node.js, Spring Boot, Flask, Tailwind CSS, Express.js.

Databases & Cloud: PostgreSQL, Supabase, RESTful APIs.

Tools & Platforms: Android Studio, Git, GitHub, VS Code.

Experience

Eduskills Academy — Java Full Stack Developer Virtual Internship

Full Stack Developer Intern

Remote

Jan 2026 – Mar 2026

- Designed and implemented 5+ RESTful APIs using Java and the Spring Boot framework to handle server-side business logic, authentication flows, and database operations, reducing average API response latency by optimizing query patterns.
- Optimized query patterns to improve API response performance and scalability.

Google — Android Developer Virtual Internship

Android Developer Intern

Remote

Oct 2025 – Dec 2025

- Architected and built mobile application layouts in Android Studio using XML-based UI components, implementing fully responsive user interfaces that correctly adapted across 10+ distinct screen sizes and Android API levels.

Projects

InvertisConnect — Alumni Engagement Portal | Next.js, Supabase, Tailwind CSS, OpenAI API, RBAC

Apr 2026

- Architected a full-stack alumni networking platform from the ground up using Next.js 14 (App Router) and Supabase, enabling verified students and alumni to connect, share knowledge, and engage in real time.
- Implemented a strict, multi-tier Role-Based Access Control (RBAC) system with Supabase Row Level Security (RLS) policies, ensuring that data access was authorization-gated at the database layer.

Election Assistant Web App | HTML, CSS, JavaScript, Google Maps API

May 2026

- An intelligent, personalized web-based Election Assistant that guides users through voter registration, eligibility checks, polling locations via Google Maps API.
- Integrated Google Maps API to provide real-time location-based polling booth navigation and interactive map visualization.

Yatrimate — Real-Time Public Bus Transportation System | Node.js, PostgreSQL, Tailwind CSS, REST APIs

Sep 2025

- Built a real-time public transport tracking and scheduling application targeting under-served small cities, delivering live bus location updates, automated timetable generation, and dynamic fare estimation in a single platform

ApnaCafe — Restaurant Website | HTML, CSS, JavaScript

May 2026

- Developed a responsive restaurant website with an elegant and user-friendly interface for showcasing food items, services, and restaurant details.
- Implemented responsive design for mobile, tablet, and desktop compatibility.

Certifications & Achievements

Embedded Programming Challenge — SHAASTRA

IIT Madras

Adobe India Hackathon — Online MCQ Assessment + Coding Round
